

INNOVATIONS FOR LIVING®

VentSure® 4-foot Strip Heat and Moisture Ridge Vent

FEATURES AND PRODUCT BENEFITS

Performance

VentSure® 4-foot strip ridge vent has an unprecedented net free vent area for a ridge vent; **20 square inches per lineal foot**. VentSure 4-foot strip ridge vent works with supply or intake ventilation like under-eave soffit vents to maximize the flow of cool, fresh air through your roof and attic structure which results in a more comfortable home. Proper ventilation may help increase energy efficiency or help to prevent premature aging of your roof structure.

Protection

Unlike other competitive products, the VentSure 4-foot strip ridge vent features a unique flat baffle design that improves air flow by keeping leaves, pine needles or similar debris from impacting the performance of the vent. This baffle design also helps deflect wind driven rain and snow from entering vent structure.

Maximum Versatility

The VentSure 4-foot strip ridge vent includes a unique patent pending corrugated ridge line that allows for additional flexibility and strength to accommodate various roof pitches while creating a straight, strong ridge.

Easy Application

The new *VentSure* 4-foot ridge vent offers various features that help aid in a quick, problem free installation.

- Interlocking Pins** *VentSure* 4-foot strip ridge vent features an innovative interlocking feature which provides easy positioning and securing of the vent on the roof.
- Structural Support** Because the new *VentSure* 4-foot strip ridge vent was designed with the installer in mind, structural braces are positioned for maximum strength and support for hammering and nailing in most conditions.
- Nailing Aids** *VentSure* 4-foot strip ridge vent features a total of 10 recessed pre-drilled nail holes on each vent to help insure a flat, clean surface for applying the cap shingles and to help reduce the risk of warping caused by fluctuating outside temperatures.
- Pre-molded End Closures** Each 4-foot strip includes a pre-molded end closure on either end to help protect from wind driven rain and snow.
- Nails Included** The new *VentSure* 4-foot strip ridge vent includes 2.5" galvanized nails for ridge vent and cap installation; the right tools for the job.
